# Rotofast™
Acoustical Panel Anchors

Step-by-Step
**Installation**

(R-EZ)
Rotofast™
EZ Clip

Rotofast EZ Clips are a secure, easily removable solution for acoustical panel installation.
See rotofast.com for the Rotofast EZ Clip installation video.

STEP 1A | **1B**

Measure and mark the location where panel will be placed. Also mark the orientation on the back of the panel.

STEP 2

Screw Rotofast EZ Clips into back of the panel using the Rotofast driver tool. Do not over-tighten. Make sure the flange is parellel to the back of the panel.

STEP 3A | **3B**

Insert reusable marking plugs into the EZ Clips. Push panel against wall to mark EZ Clip locations.

STEP 4A | **4B**

Measure down 2 inches from each mark and draw a level line at that location.

STEP 5

Install a Z bar at each level line, centered on the mark.

*Hollow wall anchors are recommended for drywall applications.

STEP 6

Remove the marking plugs. Slide the panel down, engaging the EZ Clips with the Z bars.

Ask your panel manufacturer or Rotofast representative for recommended EZ Clip locations and quantities per panel.
